

Panasonic iPod Application

Fully integrated hardware with support for multiple generations of Apple® products including iPhone® and Touch

Features

- Charge and use iPod while in flight
- Watch movies, television shows, and other video directly through the seat-back monitor
- View slideshows while listening to background audio
- Supports most iPod generations including iPhone and Touch
- Supports models with Apple 30-pin connector

Panasonic's iPod Application combines the intimacy and flexibility of a personal media player with the power and diversity of the Panasonic X Series IFE system.

Authorized Apple Accessory

Leveraging Panasonic's strategic relationship with Apple, Panasonic has positioned itself with the industry leader in personal media player sales to become the world's largest and most technically sophisticated iPod authorized accessory to date.

Versatile

Passengers can charge their iPods while listening to music or watching movies and browsing photos through the in-seat display.

Innovative

From the first iPod to the latest in Apple iPhone technology, Panasonic is transforming in-flight entertainment for a new generation of travelers.

Panasonic's iPod Application solution supports iPod media types* including Songs, Playlists, Podcasts, Audiobooks, Compilations, Movies, Photos, and TV Shows.

*Games not supported through the IFE system
