PIONEER THE FUTURE

Panasonic Technical Services (PTS) has developed comprehensive maintenance and support packages that guarantee the system's availability and optimal performance. Utilizing our unmatched global resources and a full suite of service offerings ensures that your IFEC system remains fully operational. Our customized solutions provide guaranteed cost and complete peace of mind, allowing you to focus on the other priorities of your business. At PTS, we care for your aircraft as if it were our own!

Further, PTS is passionately participating in Panasonic's global effort to become carbon net zero by 2030! From working diligently to replace our existing fleet of vehicles, as they come up for renewal, with various Electric Vehicles to initiating a war on paper products within our business, PTS is making advances. Finally, PTS is revolutionizing its industry and first to be able to offer a full spectrum of content completely digitally or over the air.

LINE MAINTENANCE

SUPPORTING YOUR AIRCRAFT WHEREVER THEY FLY

PTS holds multiple Part 145 and equivalent approvals that allow the self-certification of work performed on the aircraft. Furthermore, our global Quality Management System ensures consistency of approach and service levels throughout the network. Each year PTS supports over 350,000 service events on more than 3,100 aircraft. Available services include: Defect Rectification & Certification, Technical Advisory and Software and Media Loading.

REPAIR

MAINTAINING YOUR PASSENGER'S DELIGHT

PTS technicians complete 140,000 repairs, extending the lifetime of each system. PTS technicians provide a superior level of service, combining technical support from Panasonic's factory with the use of 100% OEM parts. This includes products ranging from the latest high definition monitors, to the 1980s-era LRUs still in service today. Every repair is backed by a twelve month warranty on the work.

MAINTENANCE PLANNING

PROVIDING PEACE OF MIND

Through remote monitoring, scheduled maintenance and cabin inspections, PTS is able to correct 60% of all issues before they affect the passenger's experience. Our network of Operational Control Centers (OCC) continuously monitor the status of each aircraft. This results in action requests which are aligned with upcoming opportunities that allow sufficient ground times. A sampling of these functions include: Close performance monitoring and coordination of corrective actions, pre-planning of all health check and media loading activities, and escalation of any particularly complex issues for speedier resolutions.

TOTAL CARE PACKAGE

COMPLETE PEACE OF MIND

Our PTS Sales Managers will work closely with your airline to develop the optimal maintenance package to meet your budget requirements. The key benefits of our Total Care Package service include:

- Guaranteed system availability at a competitive price
- Regular performance reporting ensuring full visibility
- Proactively managed and focused maintenance operations
- Direct access to OEM maintenance and technical expertise
- Service program management ensuring an integrated approach

THE RIGHT PART AT THE RIGHT TIME

MATERIAL MANAGEMENT

Having the right part, in the right location, at the right time is essential! PTS has developed material management solutions guaranteeing the availability of the parts at the stations where they are needed. The key benefits of a material solution package include no up-front capital outlay to purchase spares, complete management of LRU repairs or upgrades and all associated logistics activities are covered throughout the lifetime of your program.

TECHNICAL SERVICES

WHEREVER YOUR BUSINESS TAKES YOU, OUR TEAM CAN BE THERE TOO!

Technical Services Aircraft Maintenance Technicians are highly skilled, yet still may have limited training in IFEC systems. The most complex systems on board the aircraft, IFEC, have a direct impact on improving the passenger's overall in-flight experience. With PTS Technical Services, the following additional expert services are available: Custom Software and Media IFE System Verification Racks, Ad Hoc Services, Training Services, Technical Support, Training and Tools, and Specialized IFE Maintenance Tools.

SPARES, LOANS, EXCHANGES & AOG

PTS sells both new and used parts, including new LRU and component parts, plus a variety of refurbished, fully certified, select hard to find and discontinued used parts. Also, PTS offers 24/7 spares support, including aircraft on the ground (AOG) and expedited global shipping to meet any specialized requirements. Additionally, we offer solutions such as LRU loans, standard or advanced exchanges and long-term support agreements. Lastly, there are various loan options available, including long term on-site spares supply agreements.
